Mr. M. L. Plantwood, editor of Hartow Tribune-News, and a former resident of this city is spending the week-end in the city with friends and relatives, coming down from Cartersville yesterday morning to accompany Mrs. Plantwood and children, on the return trip. Mrs. Plantwood has been spending several days with her parents, Mr. and Mrs. J. E. Smith on Broad.

been expected. But for the last minute recesses that rushed up from

PAT WARD URGES THAT FARMERS DESTROY ALL COTTON STALKS

For the past twenty years our government has been trying to teach our farmers how to successfully combat the boll weevil. Thousands of dollars have been spent this year in the good old state of Georgia for poison to kill this much despised pest, yet after the growing season is over our farmers are sure to see another season to come back another year with the same old fight over again, trusting to Providence to send a moderate rain, so that Mr. Farmer can make enough cotton to pay for his fertilizer and cultivation.

But of all the important measures employed he overlooks the most important of them all. (The killing of all cotton stalks at least, two weeks before frost.) Why, our farmers will not take this precaution, unable to tell but so few of them do it until there is very little accomplished by it. Yet if every farmer would do it we would not have enough old weevils in the spring to reproduce in sufficient numbers to prevent our making a normal cotton crop on a conservative acreage every year.

Reason will teach any man without the theory side, that when you destroy any thing's food you destroy it. Take from man his food and he soon perishes; take from an animal its food and the animal soon dies; take from an insect the food upon which it lives and the insect soon passes out. Then, why is it so hard to get our farmers who plant cotton every year to do this very simple job? If our stalks were plowed up and allowed to die in the early fall, by spring time they would be rotten and out of our way, but if they are allowed to stand until Christmas, before they are killed as they have for the past two years, they will be piled up and burn in many instances in order to fertilize the next crop. Then really it is economy on the part of the farmer to kill them in the early fall. It is not economy to burn the stalks up for all of our lands need more organic matter in them for profitable production of crops.

But you say, I am not going to plant cotton next year. But you are, and if you are not, you have no right as a citizen to raise boll weevils to destroy your neighbor's crop no more than you have to scatter disease and pestilence among your fellow men or disease in your neighbor's livestock. Take a conservative view of it, my farmer friends, and get the stalks down and plant your cotton fields to grain for winter grazing.

Sincerely yours, PAT WARD, County Agent.

THOMASVILLE HIGH DEFEATED PLUNKETTS

The Thomasville High eleven administered a decisive defeat to the Plunkett eleven at the East Side Grounds yesterday afternoon. The score was 14 to 4. The High School boys scoring in each quarter except the third. The Plunkett team scored in the second quarter when Thomasville kicked off. Plunkett's pulled a twenty-five yard forward pass and then Oliver went through the line on a quarterback run for a touchdown taking the High School eleven completely by surprise.

The High School team was crippled by the absence of four of the regulars, all of them being out of the team for at least two weeks because of failure in their studies. Despite this fact the team looked good and played with spirit and pep through the game. They were heavier and knew more football than their opponents so had a comparatively easy time. Lambert's work at defense was great. He is properly considered the best man at this sort of work in the Association. Burch at tackle played his usual steady and consistent game. He is also regarded as worthy of more than passing mention in a rating of the teams of the district. The work of Singleton was also better than in any game he has yet appeared. His broken field running was good and the crisis cross play pulled by the local eleven made two touchdowns in as many minutes. Lambert hit the line hard on several occasions for consistent gains but not so hard or so consistent as Shepherd, who rarely if ever stopped short of five yards when bucking.

Thomasville High scored two touchdowns in the first quarter and one in the second. In the third it was nip and tuck and Plunkett's almost succeeded in getting away twice. Shepherd pulled an end run for thirty yards during this quarter. Plunkett held however when the High School was within ten yards of goal and kicked.

In the last quarter the game was snappy. Thomasville High using a number of the second string men with Lambert and Singleton out of the line-up. For the Plunkett team Coon looked mighty good and so did Oliver. These were penalties inflicted several times on Plunkett's for time out, several of the players being temporarily knocked out throughout the contest. Plunkett's only consolation came in the form of a pass and they lost more on intercepted passes than they gained on those that did go through. The T. H. S. pulled one forward pass that was a beauty but tried very few, relying on line bucks by Lambert and Shepherd and crisis cross end runs.

Mrs. C. C. Thompson and little son have returned to their home in Columbia, S. C. after spending a month with their mother, Mrs. L. V. Rigby.

Tires and Tubes Vulcanized. Sampson's Garage.

Heavy of High Feed Value. Honey is one of the most concentrated foods. Most foods contain a certain amount of indigestible matter which is discharged from the system in the form of waste. In honey a fraction of 1 per cent only is actual waste.

WE DON'T HANDLE QUARANTEED SHIPPED EGGS. OUR EGGS ARE FRESH FROM RELIABLE PRODUCERS. Do you think they are better at 45c per dozen, than infertile eggs which anybody can guarantee the age of which you do not know? WE HAVE SATISFIED EGG CUSTOMERS.

THOMAS COUNTY EGGS Fresh from Reliable Producers. South Side Groves PHONE 114 120 E. JACKSON STREET.

CEMENT

We offer F. O. B. Savannah, carlots \$3 bbl. or more as follows: LaBonne Esperance Portland Cement in ex. 4 sq. to bbl. ex. extra at 7c each. Eagle Portland Cement in ex. 2 sq. to bbl. ex. extra at 7c each, 128 lbs. per sq. Dromedary low grade Port and Cement in ex. 2 sq. to bbl. ex. extra at 7c each, 128 lbs. per sq. The Above Price Includes 10c per bbl. Commission to Dealers.

Our LaBonne Esperance has passed all tests of Pittsburgh Testing Laboratory and Georgia Highway Department. Our Eagle also passed 28-day test and tested 82 lbs. Today when it should have tested 250 lbs., which is very little difference. Vest quantities of our Eagle's Portland Cement were used in Macon, Ga., by Major Wilson, City Eng., and at other points all over Georgia for sidewalks and Haxagon stone tile and was used in hundreds of cotton mills and other factories all over N. C., S. C. and Georgia from top to bottom, between the years of 1890 and 1905. Haxagon Stone tile-walk laid with Eagle Cement in Atlanta and Macon and other points are still giving magnificent service.

Our Dromedary tested around 100 to 160 lbs., 7 days and test and is tremendously cheaper than Hydrated lime and is tremendously better. You should use Dromedary for setting up common and fancy brick, masonry, etc., instead of Hydrated Lime. Send for test sheets showing actual tests on above Cements. MR. DEALER: You can ship your orders for 5 to 30 bbls. from Savannah at a tremendous saving in price and freight to your customers at Savannah has low rates of freight on small cars and less carload lots.

Freight per 100, Savannah, Ga., to Augusta, Ga., 44c (freight by boat Savannah to Augusta 35c per bbl.) Albany, Ga., 45c. Athens, Ga., 45c. Brunswick, Ga., 45c. Columbia, S. C., 45c. Dalton, Ga., 45c. Valdosta, Ga., 45c. Waycross, Ga., 45c.

Carolina Portland Cement Co. ATLANTA, GEORGIA

More Poultry Pin Money

You can get more eggs and make more money by feeding hens more material for making whites of eggs. No grain feed contains anything like enough white-making material (protein). As a result, many yolks are formed in the hen's body that are never laid.

Purina Poultry Chows

fed together, make more eggs because they supply the scientific balance of all the elements a hen requires to produce the highest number of whites and yolks of which she is capable. Purina Poultry Chows are sold under an iron-bound guarantee of More Eggs or Money Back.
